

WATER POLICY

At Shyam Metalics we recognize the social, economic, environmental and cultural value of water and the increasing global concern for water scarcity. Water is a key resource for all our operations – required for the health and wellbeing of employees and at every stage of an operation’s life cycle. The dependency and impact on a shared resource creates material risk for our business, which requires effective management that balances the needs of many different users.

Shyam Metalics and Energy Limited will:

- Comply with applicable national, regional and local regulations on water.
- Respect that water is a shared resource between industry, communities and ecology and ensure that our operations do not negatively impact that shared resource.
- Publicly report on the company’s water performance using consistent industry metrics and recognized approaches.
- Undertake periodic water risk management that inform the company’s water management strategies.
- Understand our water footprint at all our projects and operations and maintain a water balance that minimizes the amount of fresh water consumption.
- Identify water conservation projects through reduction, recycling and reuse and monitor progress against water consumption reduction targets.
- Educate our employees about the causes and impact of water wastage so that they can, with our help, minimize their impacts both at work and at home.
- Work with communities and communicate with all our stakeholders on the progress and performance of water conservation and management.

We will measure and report performance on a periodic basis to ensure on-going management of water resources including the sharing of good practices. The content and implementation of this policy will be reviewed periodically.
